EDUCATION

California State University, Fullerton

Fullerton, CA

B.S. in Computer Science, Cybersecurity Concentration — GPA: 3.87 / 4.0

August 2023 – Present

Expected Graduation: May 2027

Relevant Courses: Software Engineering, Data Structures & Algorithms, Files & Databases, Front End Engineering

EXPERIENCE

Software Engineering Intern, Agentic AI

June 2026 – Aug. 2026

Ingram Micro

Irvine, CA

- Designed and shipped a full-stack human-in-the-loop review application (**React** + Vite SPA, **FastAPI**, **PostgreSQL**, Google Cloud Storage) that gates LLM-generated technical specifications before ingestion into a **475-node** enterprise **Neo4j** knowledge graph; owned end to end and demoed to **20+** engineers.
- Built the security layer for a production LLM orchestrator — role-based access control at the tool boundary, **NVIDIA NeMo** input/retrieval/output guardrails, PII masking, and a correlated per-turn audit trail — refusing prompt-injection and unauthorized tool calls before they reach the model.
- Instrumented multi-agent systems with **Datadog** LLM observability and token-level cost metering, exposing per-call spend, traces, and evaluation scores, including a custom context-density metric and semantic-search similarity evals scored against live graph retrieval output.
- Developed and deployed the **React**/Material UI frontend for an order-hold automation agent on an order management platform handling **hundreds of millions of dollars** in orders and generating **billions** in revenue.

Algorithm Officer

June 2025 – Present

Association for Computing Machinery (ACM)

Fullerton, CA

- Lead weekly workshops on fundamental data structures and algorithms for 40+ students, delivering over **10** sessions on topics including arrays, trees, and graphs.
- Develop and present a curriculum of **30+** LeetCode-style problems to strengthen members' problem-solving abilities and prepare them for technical interviews.
- Provide targeted one-on-one mentorship during workshops, providing guidance on effective debugging, professional coding practices, and advanced algorithmic thinking.

Barista

Oct. 2023 – Present

Starbucks Coffee Company

Ladera Ranch, CA

- Provide exceptional customer service in a fast-paced environment, serving **500+** customers per day.
- Coordinate with team members to streamline operations, helping the store consistently exceed expectations.

PROJECTS

Air Quality Monitoring System [[Github](#)] | *C++, ESP32, Django, MySQL, React*

Jan. 2026

- Developed an end-to-end IoT system using an **ESP32** and **BME680** sensor to monitor VOCs, CO2 equivalents, temperature, and humidity in real-time.
- Built a **Django** backend with a **MySQL** database to ingest and store sensor data.
- Designed a responsive **React** dashboard to visualize environmental trends and historical data.

Group Chat Web Application [[Github](#)] | *Python, FastAPI, PostgreSQL, React, Websockets*

Sept. 2025

- Built a full-stack messaging platform with **JWT**-secured authentication, group chats, invitations, and user management. Integrated a **React** frontend and implemented **WebSockets** for real-time chat messaging
- Designed a **PostgreSQL** schema (accounts, chats, messages, invites) with **SQLAlchemy** ORM to ensure persistence, relational integrity, and data validation.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript/TypeScript, SQL, HTML/CSS, Assembly

Frameworks & Libraries: React.js, FastAPI, Django, SQLAlchemy, Material UI, Google ADK, NeMo Guardrails

Databases & Platforms: PostgreSQL, MySQL, Neo4j, Google Cloud Platform, Supabase, Vercel, Linux

Concepts & Protocols: REST APIs, WebSockets, JWT, RBAC, Model Context Protocol, LLM Evals, TCP/IP, HTTP

Developer Tools: Git, Bitbucket, Jira, Datadog, Docker, Vite, pytest, VS Code, Vim, Agile Methodology
